Discrete RVs Review Quiz

Mallick Hossain

University of Pennsylvania

1. Have you submitted your R project proposal?

1. Have you submitted your R project proposal?
    - The correct answer is "Yes"

1. What is the expectation of a discrete RV?

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$
4. Is $E[Y|X]$ random or constant?

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$
4. Is $E[Y|X]$ random or constant?
   - Random

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$
4. Is $E[Y|X]$ random or constant?
   - Random
5. X and Y can only take values 0 or 1. The joint distribution is $p(0, 0) = 0.2, p(0, 1) = 0.3, p(1, 0) = 0.2, p(1, 1) = 0.2$. Is this valid?

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2X]$? X and Y are not independent.
   - $aE[Y] + b^2E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$
4. Is $E[Y|X]$ random or constant?
   - Random
5. X and Y can only take values 0 or 1. The joint distribution is $p(0,0) = 0.2, p(0,1) = 0.3, p(1,0) = 0.2, p(1,1) = 0.2$. Is this valid?
   - No. The sum over all possible pairs should exactly equal 1.

1. What is the expectation of a discrete RV?
   - $E[X] = \sum_{i=1}^{n} x_i p(x_i)$
2. What is $E[aY + b^2 X]$? X and Y are not independent.
   - $aE[Y] + b^2 E[X]$
3. What is $Var(aX + bY)$? X and Y are not independent.
   - $a^2 Var(X) + b^2 Var(Y) + 2Cov(X, Y)$
4. Is $E[Y|X]$ random or constant?
   - Random
